Automate your portfolio in seconds

5 simple steps that will change the way you think and approach the stock market

Step 1: Choose a Trading Strategy

Choose a pre-built strategy from a library of free examples, buy one in the marketplace or create your own. Want to get started quickly? Select a pre-built automated trading strategy and fast forward to Step 5 to connect your chosen Breaking Equity strategy to your existing broker account.

- ☒ Community Marketplace
- ☒ Library of Examples
- ☒ One-Click Strategy Cloning

Develop your own trading strategy using our simple, online editor.
Combine technical indicators with news and PR to find the alpha.

Quickly identify and focus on what you want to trade. Screen for momentum in the market, relative strength, relative weakness, relative volume or even overbought and oversold stocks. Choose the trading details that will drive your profits.

Validate and test your ideas against 20 years of institutional grade historical data. Create a benchmark ema / sma cross or moving average convergence divergence strategy and find the high probably setup you want. Verify it works before launching.

Once you choose or build your automated trading strategy let your Algo do the trading. When ready link the strategy to your existing broker account and start trading.

Aryan
Day Trader

I was very excited to getting started. It was nothing comparing the moment when I figured out how to beat the market with algos that can trade every day and do this consistently.

Dylan
Day Trader

I was always fascinated by trading for many years. The reality is that I never front of a screen was not an option to get where I wanted to be - a professional trader.
